## HONOR AND THE TANGLED WEB

A Baccalaureate Discourse  
On the Moral Anatomy  
Of Deceit and Its Bearing  
Upon the W&L Vision

*Dr. Louis W. Hodges*

*Dr. Hodges is the founder and director of Washington and Lee's program in professional ethics of medicine, journalism, and law. He received his undergraduate education at Millsaps College and his Ph.D. from the University of North Carolina. This article is adapted from his baccalaureate sermon to W&L's graduating students and their families in June.*

The *Wall Street Journal* this past January reported on a class at the Harvard Business School. The headline on the article said "To some at Harvard, telling lies becomes a matter of course." The subhead read: "Untruths can improve grade in business school class." The article detailed the method of teaching in a negotiations course. If in negotiating a business deal with another student, a student was able to gain an upper hand by lying, he got the high grade and the deceived student a low one. The teacher preferred to call the practice not lying but "strategic misrepresentation."

Another author, Albert C. Carr, employed another euphemism for lying; he called it "bluffing." Writing in the *Harvard Business Review*, Mr. Carr claimed that the ethics of business are not those of society, but rather those of the poker game. He cited the case of a salesman who found himself without a job. "The man was 58, and in spite of a good record, his chance of getting a job elsewhere in a business where youth is favored in hiring practices was not good. He was a vigorous,

healthy man, and only a considerable amount of gray in his hair suggested his age. Before beginning his job search he touched up his hair with a black dye to confine the gray to his temples. He knew that the truth about his age might well come out in time, but he calculated that he could deal with that situation when it arose. He and his wife decided that he could easily pass for 45, and he so stated his age on his résumé." At that point Mr. Carr added the following judgment: "This was a lie; yet within the accepted rules of the business game; no moral culpability attaches to it."

In her recent treatise on lying, Dr. Sissela Bok finds that deception appears increasingly to be a way of life. It is common practice for many doctors, for example, to tell what some regard as the "benevolent lie." The instructions in one hospital advised the doctor that if a patient with a certain type of fever asks what his temperature is, the doctor should say, "Your temperature is normal today." By that he would mean not that the thermometer read 98.6, but that for someone in precisely that patient's condition, namely one with a high fever, his temperature was normal.

Professor Monroe Freedman has concluded that since the lawyer's complete obligation is to his client, in some cases the lawyer should not reveal to the court the fact that the client's testimony is perjured.

---

## HONOR AND THE TANGLED WEB

---

“He who deceives us impinges on our freedom, our autonomy, our capacity to be human and build our life. . . . He who deceives us thus assaults our humanity.”

---

In literature, stories about deceit are plentiful. In the Garden of Eden, for example, the serpent deceived Eve by getting her to believe that God Himself first deceived. The implication of the serpent's statement to Eve is that God gave Adam and Eve the wrong reason for his prohibition of eating the forbidden fruit.

When Abraham journeyed into Egypt with his wife, Sarah, he feared that the Egyptians would so want his beautiful wife that they would kill him and take her. He therefore lied by presenting her as his sister. The Pharaoh did take her, but he did not kill Abraham.

Iago deceived Othello concerning Cassio's drinking and got Cassio discharged. Thereby Iago began weaving his tangled web. Iago encouraged Cassio to ask Desdemona to plead with Othello on his behalf. Iago then used Cassio's meeting with Desdemona as a first step in his deception of Othello about her fidelity. Partly by outright lie and partly by innuendo, Iago played deftly on Othello's self-doubt, on his uncertainties about the ways of Venice, his lack of skill in soft conversation, and his advancing age. Iago was, of course, successful in deceiving Othello, thereby prompting his murder of Desdemona and his own suicide.

In theological literature we find many moral analyses of deceit, especially of lying. Augustine, for example, regarded lying as a mortal sin which was never to be condoned. He concluded that one should not even lie to a robber, though telling the truth to the robber may assist him in laying low his victim. Aquinas and Kant reached a similar conclusion about the obligation not to lie even to the robber.

On the other hand, Paul Lehman, a modern theologian, thinks differently. He poses a question about the duties of the person who has a car to sell. The seller is not obligated to be truthful to the buyer. Lehman's tortuous logic is that "If the buyer and the seller of the car come through the transaction to a true consideration of each other's predicament, then they do not merely transact business. The business transaction becomes instrumental to their discovery of each other as human beings." You will look long and hard before you find a more tangled web than Lehman weaves.

Another theologian, Dietrich Bonhoeffer, poses this dilemma. A Jewish friend in Nazi Germany comes to your door asking for asylum, and you grant it. The SS a few minutes later knocks on your door and inquires about your friend. You have, in Bonhoeffer's view, a positive moral obligation to deny knowledge of his whereabouts. Bonhoeffer then justifies this conclusion by claiming that this is not a case of lying, since you

are "being true" to your friend. While you and I might agree with him on the obligation not to betray your friend, we would perhaps not feel obligated to go through the charade of denying we had lied in order to do so.

Deceit comes in all sizes and shapes. Sometimes it takes the form of pure and simple false statement or untruth, sometimes the "white lie," but sometime the lie of literal truth. The story is told, though I have not been able to document it in detail, of a conversation between John Dean and Jeb Magruder. Magruder consulted Dean about his testimony at a hearing. Magruder was sure the committee would ask him about the secret fund in Haldeman's safe. He asked Dean's advice. Dean is said to have told Magruder, "Simply tell them there is no secret fund." In justification of that advice Dean continued: "You know about the fund, don't you? Haldeman knows about it; Ehrlichman knows about it; and so do I. Now, when so many people know about a fund it certainly is not secret."

Aware as we are, then, of deceit as a theme in literature and as a reality in life, perhaps it would be useful to examine its anatomy, its effects, and its roots.

It is curious that when the schoolmen enumerated their lists of "deadly sins," deceit was rarely among them. Perhaps the reason is that they viewed deceit as merely an evil means to deeper and more ignominious ends, greed or lust, for instance. But is it not more? Is a willingness to deceive not a fundamental violation of the Jewish and Christian obligation to love and serve others?

Deceit is—in its intent and in its effect—a form of aggression against the deceived. The logic is this: Among the absolute prerequisites for a genuinely human life is freedom to select and pursue one's goals. The human being is in some measure an autonomous, self-directing being. But in pursuing our goals, we act toward the world only in terms of our perception of that world. Thus it is vital that our perception of the world around us conform as closely as possible to the way that world really is. A correct perception of the world around us is a precondition for freedom to pursue our goals effectively.

Hence it follows that he who deceives us impinges on our freedom, our autonomy, our capacity to be human and build our life. He who plants falsehoods, half-truths, and misperceptions in our minds deprives us of the precious precondition to a genuinely human life. He who deceives us thus assaults our humanity. Since this is the catastrophic effect of deceit, it is clearly a violation of our deepest moral obligations. Hence deceit is not merely an innocent means to some sinful end such as lust or greed. It is, instead, intrinsically a frontal attack on

---

“But what about the deceiver? Ultimately, his willingness to deceive deprives the deceiver of freedom also. . . . Being untrustworthy, he loses his capacity to trust.”

---

people through the reduction of their freedom.

It is a powerful form of assault. This is clear in *Othello*. Few people, and especially Iago, would have dared attack mighty Othello with the sword. But by deceit even puny Iago could create false images in Othello's mind which robbed him of his capacity to trust Desdemona. With trust destroyed, love evaporated. In its place grew resentment and revenge. These led to Othello's murder of Desdemona and to his suicide.

Deceit, then, is finally an attack on others and thus contrary to Jewish or Christian moral duty. But what about the deceiver? Ultimately, his willingness to deceive deprives the deceiver of freedom also. He who lies easily slips into the routine of *being* a liar and of *living* the lie. He begins to lie to cover his lies. He is afraid, afraid of being found out. Sir Walter Scott was right:

Oh, what a tangled web we weave,  
When first we practice to deceive!

But the plot thickens for him who would deceive. Given the tendency to project ourselves into others, the liar becomes increasingly unsure of the truthfulness of others. Being untrustworthy, he loses his capacity to trust. And as that capacity is diminished he feels isolated, uncertain, and fearful. Thus the freedom of the liar is effectively curtailed. He who is not free to trust is not free to be human.

These observations suggest that deceit is destructive to both the one deceived and the deceiver. But what happens when the deceived and the deceiver are one and the same person? What about self-deceit? Self-deceit may well be its most powerful and destructive form. One may deceive oneself, for example, about talents and abilities. If we believe ourselves to have vast talents when we do not, the result is paralyzing frustration. If we believe ourselves to have fewer talents than we in fact possess, the result is underachievement and indolence. Since human life depends upon our knowing ourselves accurately, to be deceived about oneself may be the ultimate failure.

So much for the moral anatomy of deceit. This brings us, at last, to the point of this article. This University is a very special place. The student here is exposed to vast information—and some of it takes. The student at Washington and Lee is exposed to the great ideas and artifacts of human history—and some of them inspire him.

But those things the student could find or do quite well by himself, or at some other place. Those things require a library, some museums, and a laboratory, not necessarily a university. A university is far more than an information machine. A good university is a community in which we grow not merely

intellectually but as persons, as human beings. That personal growth occurs as we come to trust and to be trusted.

We have sought to build such a community at Washington and Lee. In part we succeed; in part we fall short. But the student at this University lives his life for three years, or four, or seven, in a special place where the vision remains of human beings living together in mutual trust. We expect ourselves to be “gentle men.” We expect ourselves not merely to trust others but to be ourselves worthy of their trust.

These expectations—and they are both difficult and noble—are nowhere more concretely manifested than in the Honor System. But just as honor and trust are fragile, so is an honor system. It is open to misperception. To see the Honor System as merely a “code of conduct” is to misperceive it. Codes of conduct have as their only legitimate end the shaping of what one *does*. Honor has instead also to do with what one *is*. To perceive the Honor System merely as a way of preventing lying, cheating, and stealing is also to misperceive it. Insofar as it prevents those things, it performs a mere police function. To see it in that way is to debase honor to a mere utility. Further, if we perceive the Honor System as valuable because of its utility in diminishing lying, cheating, and stealing, it will gradually cease to have even that function. It would then receive no more respect than any other system of regulating human conduct. Nor would it deserve more respect than that.

Instead, community at Washington and Lee is rooted in a vision. It is a vision of what life might be like when men are honorable, when men's lives flow from an aspiration, the hope not merely of *acting* honorably but of *being* honorable.

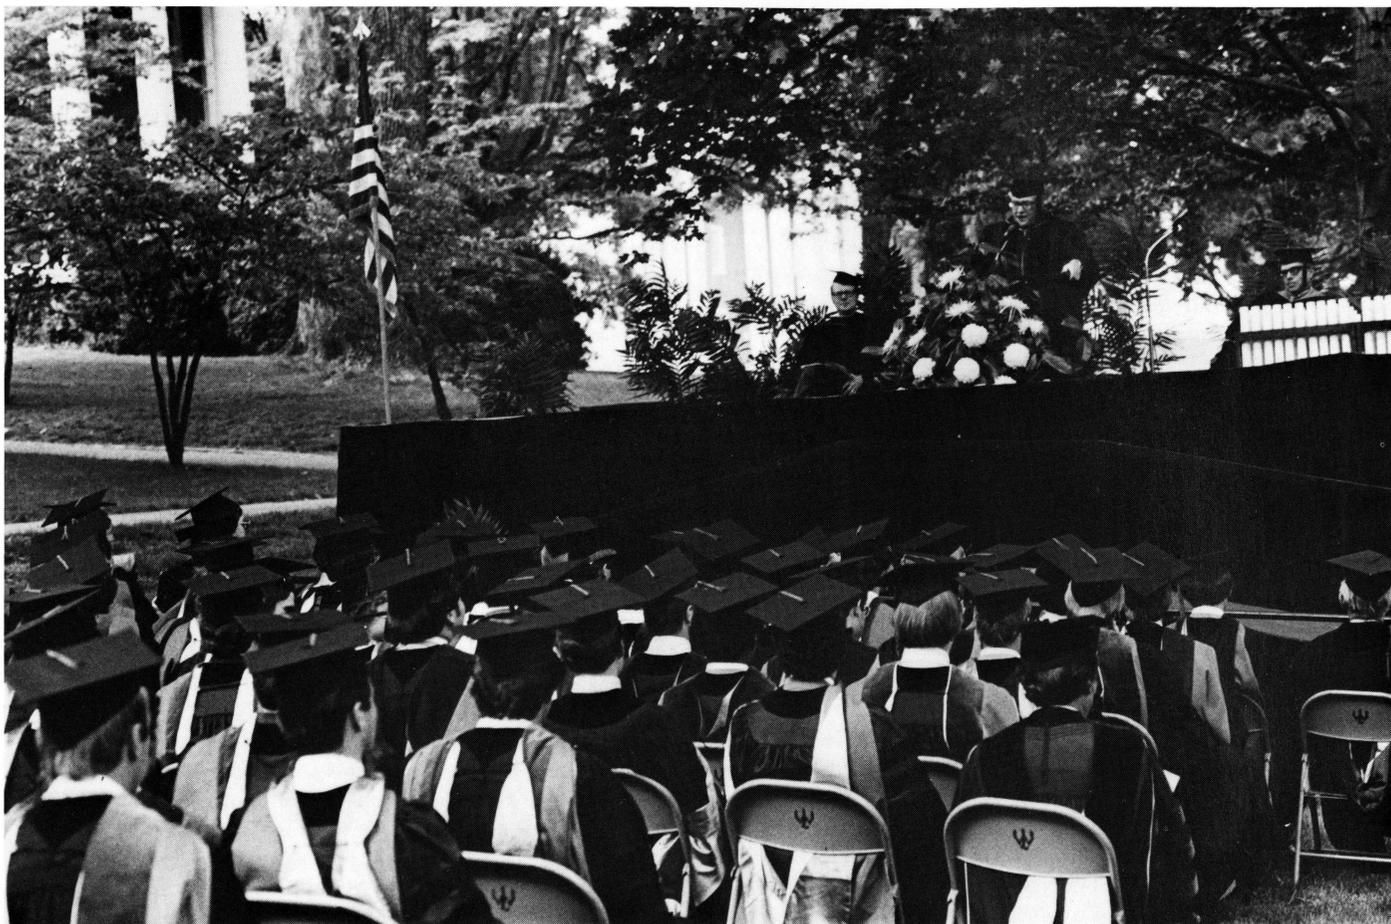

The power of that vision to transform us is a direct result of its simplicity. On the one hand, it envisions the dignity and worth of every human life. On the other hand, it demands that measure of humility which nurtures in us a willingness to serve the needs of people. Being honorable is the basis for every true human community.

That, of course, is what covenant is about in the Old Testament, and the Kingdom of God in the New. In this sense, Washington and Lee, conceived as it was in a minister's study, is not unmindful of its Christian heritage.

At Washington and Lee, one is part of a special community, and remains a part of it even after leaving. Our community is special because of our vision of what it is to trust. That vision, like many of life's more vital lessons, is one which cannot be taught; rather, it must be caught. It can be caught only by living in a community where it lives. We have lived there—students, alumni, even faculty, staff and administration. Iago did not.

# COMMENCEMENT 1979

387 Men and Women Receive Degrees; Three Alumni, Benefactor Are Honored

*Dean Roy L. Steinheimer addresses law graduates at exercises held 10 days before the undergraduate commencement.*

Washington and Lee awarded diplomas to 387 men and women and conferred four honorary doctorates in commencement exercises this spring.

The honorary degrees were presented to three prominent alumni and a generous W&L benefactor: Dr. Harry Lyons, '22, of Richmond, dean of the School of Dentistry at the Medical College of Virginia from 1951 to 1970; Dr. John David Maguire, president of Old Westbury College, a component of the State University of New York; Miss Ruth Parmly of New York City, who gave \$1.5 million to Washington and Lee four years ago and for whose father Parmly Hall, the "new" science building, is now named; and John F. Watlington, former president, board chairman and chief executive officer of Wachovia Bank &

Trust Co. of Winston-Salem, N.C., now chairman of Wachovia's executive committee.

Commencement-week activities began with the traditional baccalaureate sermon, delivered this year by Dr. Louis W. Hodges, director of W&L's program in pre-professional ethics. His remarks are the substance of an article in this issue.

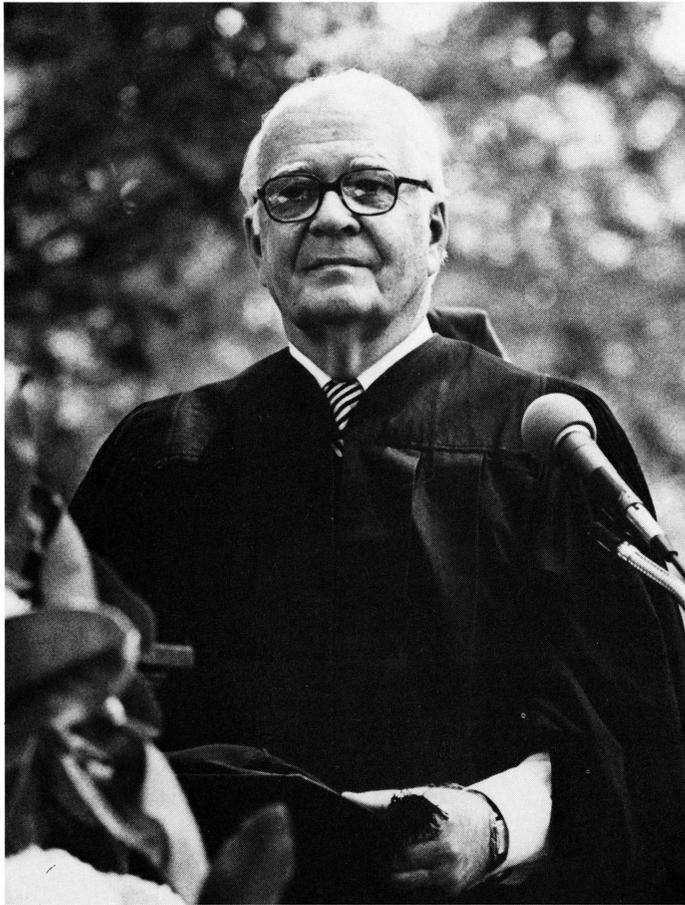

The School of Law awarded 116 Juris Doctor degrees at the end of May. Law diplomas were presented in a ceremony separate from that for the undergraduate divisions because of the difference in academic calendars.

President Huntley was the speaker at the law ceremony, which was followed by a reception for graduates, their families, and the law faculty.

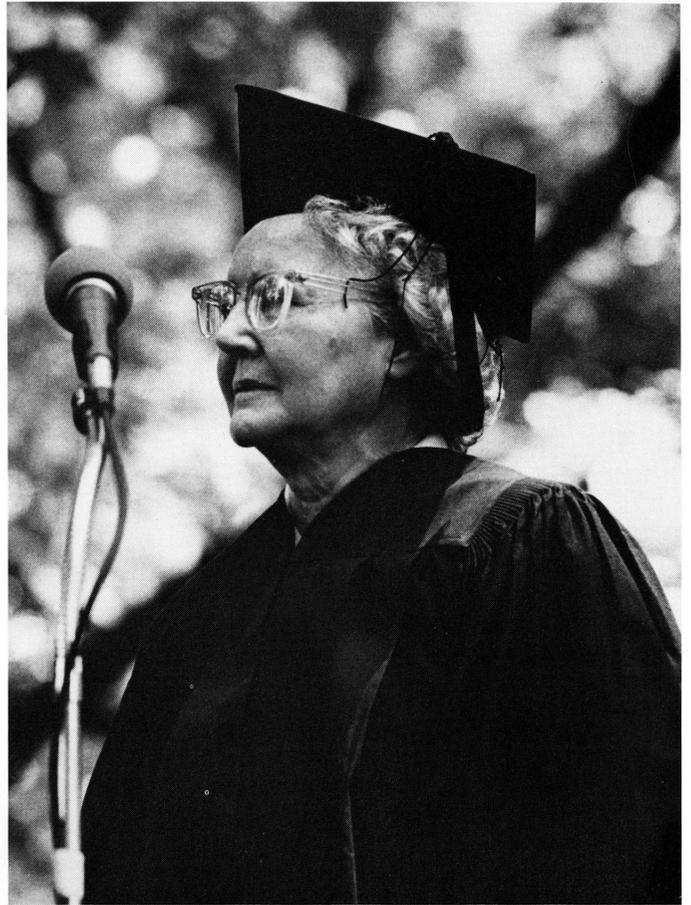

Undergraduate graduation exercises took place 10 days later, beginning with a

commissioning ceremony for 13 graduates of the Reserve Officer Training Corps program. Major General John R. D. Cleland, director of plans and policy for the Joint Chiefs of Staff, was the speaker. Gen. Cleland's son, Gary, was among the ROTC cadets who were commissioned as second lieutenants. Cleland earned Distinguished Military Graduate honors.

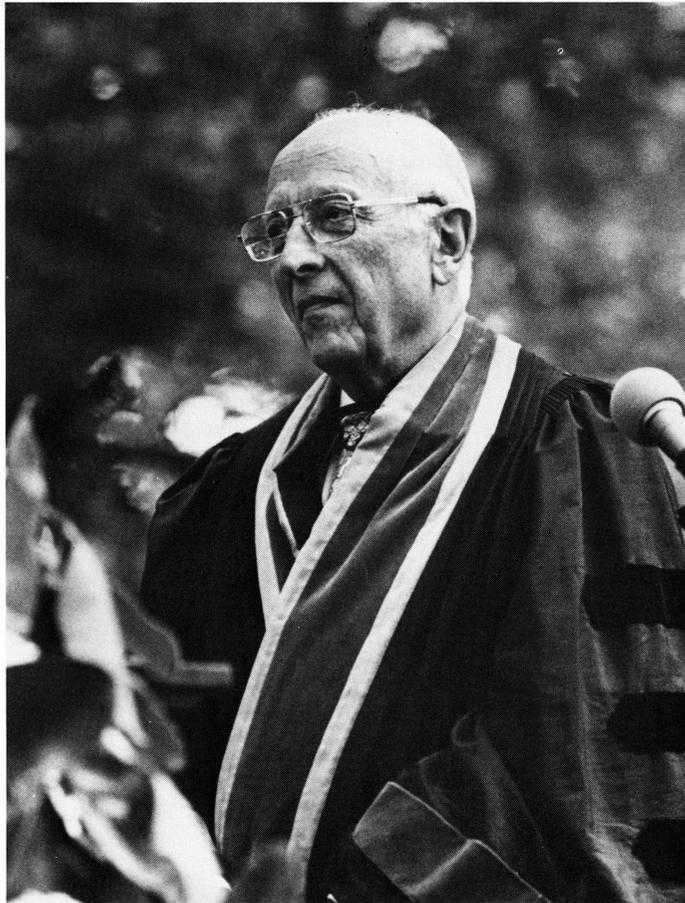

In his remarks to the 271 B.A. and B.S. graduates and their families, President Huntley warned against blind reliance by the American people on leaders whose principal trait seems to be charisma, a leader—elected or otherwise—"whom one greatly admires or is attracted to," to

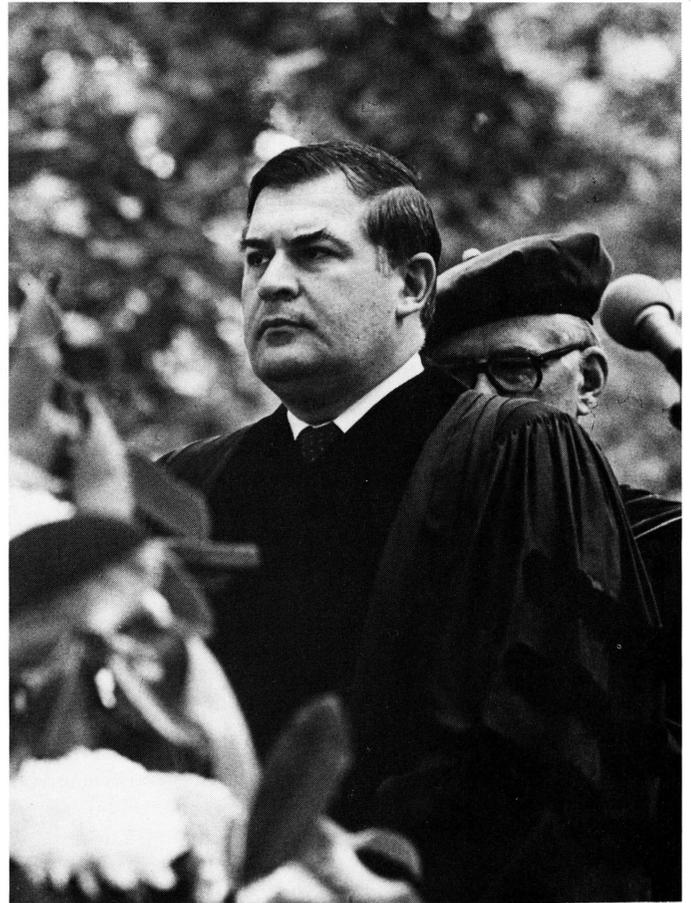

*John F. Watlington, Doctor of Laws*

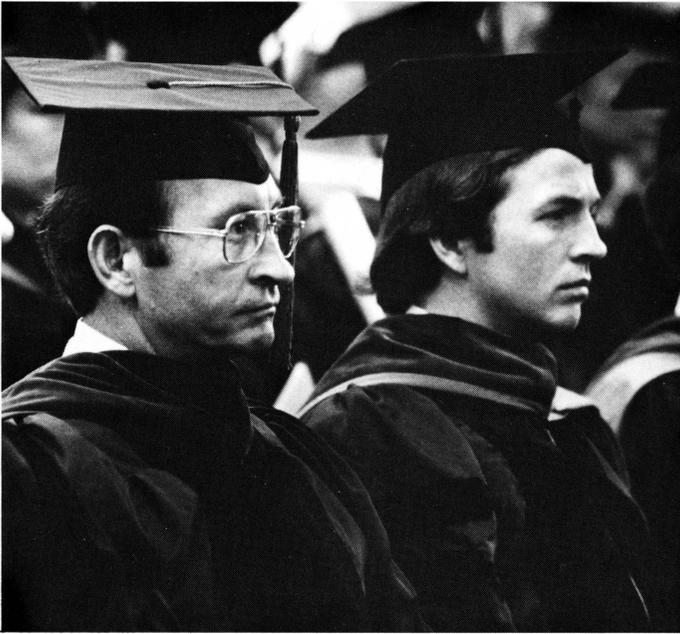

*Miss Ruth Parmly, Doctor of Humane Letters*

*Dr. Harry Lyons, Doctor of Science*

*Dr. John David Maguire, Doctor of Letters*

*Louis McFadden and his son Louis P. Jr. put on a father-son act at the law commencement. They both received Juris Doctor degrees. Another McFadden son, Kevin, received a B.A. degree.*

*Trustee E. Waller Dudley, '43, '47L, stands behind a solid W&L family group: son Luther H. Dudley, '76, and his wife Sug, daughter of former Trustee Jack Crist, '45, and son Waller T. Dudley, '74, and '79 law graduate.*

*Dr. G. Edward Calvert, '44, of Lynchburg (second from left) was the proud father of two graduates, Matthew J. Calvert (left), Juris Doctor, and Robert A. Calvert, B.A. With them is President Huntley.*

*A happy group from Jackson, Miss., were Susan Elliott, law graduate Robert P. Wise, Joseph P. Wise, '74L, Louise Wise Lucas, Mrs. Sherwood Wise, and Sherwood W. Wise, '32, '34L.*

whose beliefs one may become "vicariously committed."

The risk in following charismatic leaders, Huntley said, is that it "creates merely an illusion of democracy. It abandons belief in the wisdom of the democratic process and substitutes for it belief in the wisdom of the charismatic leader. . . . I'm not sure I much prefer an elected monarch to one selected in some other way."

Huntley said he was vexed at the currently fashionable attacks on "what used to be called the American Experiment" by "distinguished and learned persons" who believe it is "failing and must eventually be supplanted. The conclusion is not usually stated in quite that bald fashion," Huntley said, "but if

you listen or read carefully you will have no trouble finding it."

"The crux of the American Experiment," he said, is that "the principal sovereign is the individual"—not an easy responsibility; it may well lead to weariness and eventual abandonment of the "burden of self-rule." A vacuum then inevitably results, he said, which in turn is almost certain to be filled by the government. "If the state does not become authoritarian, the void left by the default of the people would be enormous.

"But [the American] government, since it is constructed on an opposite premise, is especially ill suited to become the monolithic authority in our national life.

. . . As we lose the common personal and moral values we once shared, as ancient faiths are withered or distorted, as the

problems of a modern, overcrowded society press in around us, we are increasingly likely to yield to that tendency to give up a personal sovereignty which we no longer know how to exercise."

Washington and Lee, however, stands in an effort to counter that tendency, Huntley said; the University "embodies in some almost-mystical way those qualities upon which the American Experiment depends." And, like the American Experiment, W&L is "a fragile enterprise. If those who love it do not nourish it, it will not long survive."

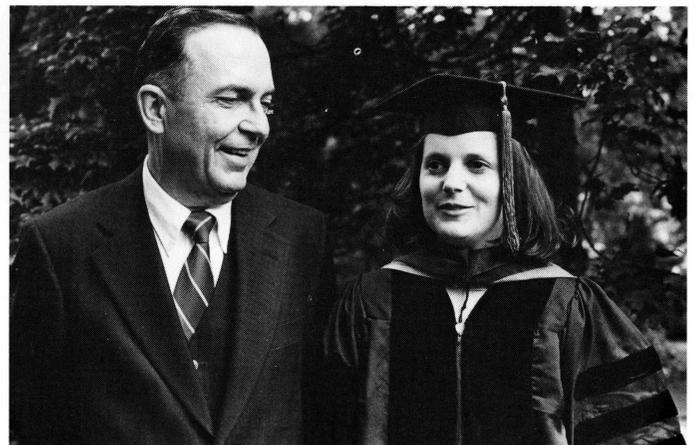

The Algernon Sydney Sullivan Award, conferred by the faculty on the

Sons of alumni who received Juris Doctor degrees stand behind their fathers: Joseph B. Martin, '49 (Channing J.); E. Waller Dudley, '43, '47L (Waller T.); G. Edward Calvert, '44 (Matthew J.); Mrs. Jerome Greenberg, husband '46, '48L, deceased (Richard L.); Robert T. Vaughan, '42, '44L (Robert T. Jr.); Louis P. McFadden, '79L (Louis P. Jr.); Sherwood W. Wise, '32, '34L (Robert P.); Frederick T. Bromm, '42 (Frederick W.).

Harry Franklin Hoke III, winner of the Algernon Sydney Sullivan Award, displays plaque for his parents.

Susan H. Gray, Juris Doctor recipient, with her alumnus father, George H. Gray, '50L.

student who has most conspicuously excelled "in high ideals of living, in spiritual qualities, and in generous and disinterested service to others," was presented to Harry F. Hoke III of Richmond, a *summa cum laude* graduate in mathematics and physics who was captain of the swimming team and a junior-year member of Phi Beta Kappa.

Robert E. Atkinson Jr. of Kingstree, S.C., was the 1979 valedictorian. He was graduated with majors in history and philosophy, and had a perfect 4.0 grade-point average—only the sixth W&L man to achieve such a record in recent years.

Dr. Lyons, who received the honorary Doctor of Science degree, is a member of the Class of 1922. He is a former president of the American Dental Association, the American College of Dentists, and the

American Association of Dental Schools.

The dentistry building at the Medical College of Virginia is named for him.

The honorary degree citation for Dr. Lyons remarked that Washington and Lee's regard for him is already so great that "it would be impossible to obey the dentist's familiar admonition to 'open a little wider, please!'"

Dr. Maguire is in his second five-year term as president of Old Westbury on Long Island. He is a 1953 Phi Beta Kappa graduate of W&L and was a Fulbright Scholar in Scotland in 1953-54. He earned one of only eight *summa cum laude* degrees ever awarded by Yale University's Divinity School; he also earned his Ph.D. in theology and psychiatry from Yale.

W&L conferred the honorary Doctor of Letters degree on him.

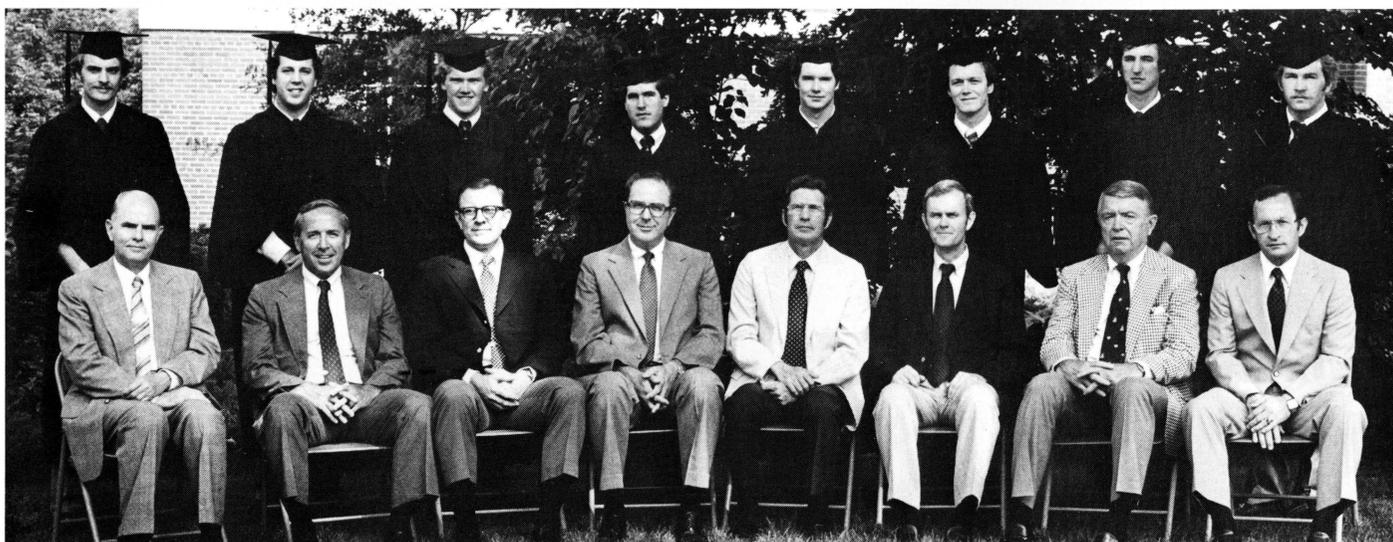

Dr. Maguire became president of Old Westbury in 1970 after 10 years at Wesleyan University in Connecticut. Last fall *Change* magazine, one of the most influential education journals, chose him as one of its 100 "most respected emerging leaders in higher education."

Miss Parmly's father, Charles Howard Parmly, was the founder of City College of New York's engineering school and was its first professor. Neither Miss Parmly or her father had any direct connection with Washington and Lee—though her family knew Mr. and Mrs. Robert Parker Doremus, who benefacted the University in 1914 after visiting the campus on a Southern trip.

Miss Parmly's gift was one of six of

Sons of alumni who received academic degrees stand behind their fathers: Roland E. Cote, '46 (John); Marvin P. Meadors Jr., '55 (Marvin III); J. Edward Moyler Jr., '51, '55L (James E. III); Harry A. Berry Jr., '49, '51L (George); William J. Scott Jr., '42 (David); John J. Mangan, '42L (Stephen); A. A. Radcliffe, '37 (Lee, '76, Andrew, '79); James H. Flippen Jr., '53L (James H. III); Ruel W. Tyson Jr., '52 (David); Kendall C. Jones, '37 (Kendall C. Jr.); Percy D. Ayres Jr., '24 (Percy D. III).

More sons of alumni who received academic degrees stand behind their fathers: Samuel M. Hairston, '51L (Henry); William R. Mauck, '52 (William Jr.); John E. McDonald, '57 (John Jr.); Gordon G. Tucker, '54 (William); Roy A. Craig Jr., '53 (John); J. Spencer Frantz, '54 (J. Spencer Jr.); Robert P. Tyson, '43 (Todd); Louis P. McFadden, '79L (Kevin).

more than \$1 million Washington and Lee received during the \$36-million first-phase development program. She said she chose to endow Washington and Lee because it stands for the same commitment to teaching excellence and to honor which her father cherished.

Miss Parmly herself is a graduate of Vassar and of Columbia, where she earned the M.A. degree. Columbia's Institute of French Studies later published her thesis, *The Geographical References in the "Chanson de Garin le Loherain."* Miss Parmly received the honorary Doctor of Humane Letters degree.

Watlington was valedictorian of W&L's 1933 graduating class. He joined Wachovia in that year and by 1946 had become senior vice president and chairman of its

### Zounds! It's Omega Again for Z.Z. Zadins

If your initials are Z.Z.Z., you're accustomed to being at the end of every line. And so it was at graduation. Zintars Zigurds Zadins, a B.A. graduate in geology, was 271st out of 271 to receive his diploma. Actually, his diploma itself was rather extraordinary. The diploma-printer didn't have enough capital Zs (who does?), so Mr. Zadins' sheepskin had to be run through the press three times. There was a move among some of the faculty and administration to move Mr. Zadins to the front of the line as a graduation gift, but strict alphabetarianism prevailed in the end.

Charlotte, N.C., board. In 1956 he became president and chief executive officer of the parent company, and in 1974 was elected chairman of the board. Since 1977 he has been chairman of the executive committee.

He is a member of the board of the Virginia Foundation for Independent Colleges, the 12-member joint fund-raising group of which W&L is a founding member. Watlington is also chairman of the board of visitors of Wake Forest University's Bowman Gray School of Medicine and a member of the boards of Union Theological Seminary in Richmond and Duke University's Graduate School of Business Administration. He received the honorary Doctor of Laws degree.

# GAZETTE

## W&L's Admissions Situation Brightens in Both Quantity and Quality

---

### Admissions reports

Fifty-six percent of the applicants to whom W&L offered admission last spring confirmed their decision to attend W&L—an extraordinarily high “yield,” admissions officials said.

The number of applications the University received for undergraduate admission was 1,085 this year, up 11.2 percent from the 1978 figure, (which was the lowest in many years). The decline in 1978 was attributed to the addition of a formidable essay requirement as part of the application form, but the University later concluded that the essay requirement had a negligible effect either on the size or the academic quality of the class that actually enrolled, and that the essay apparently had the effect of discouraging applications primarily from poorly qualified students and students who were not strong in their desire to attend W&L to begin with.

This year, in addition to the rise in the absolute number of applications, the University had a sharp jump in the number of “top-ten-percent” students who confirmed their decision to enroll at W&L. Of the 369 students who confirmed their admission, 27 percent rank in the top 10 percent of their secondary-school classes. A year ago the comparable statistic was 22 percent. And the “top-20-percent” figure jumped even more sharply, to 67 percent this year from 56 percent in 1978.

Sixteen of the freshmen who will enter W&L in September were valedictorians or salutatorians in their high-school classes, and five of the entering students are National Merit Scholars.

The School of Law, meanwhile, received 1,177 applications for 115 places in the entering class. The application pool was down 9 percent from the figure a year ago—a smaller decline than the nationwide drop in applications to all law schools, which is estimated at 10 to 14 percent.

Judging by their undergraduate grade-point averages, the entering law students are the smartest W&L has ever had. The mean grade-point is 3.38 on a 4.0 scale, up from last year's 3.27. The average score on the standardized Law School Admission

Dr. William Buchanan

Test (LSAT), however, dropped eight points to 641 from last year's record 649 average. (The 1977 and 1976 LSAT averages were 639 and 641.)

---

### Faculty promotions

Promotions in rank for eight members of the undergraduate faculty will become effective Sept. 1.

Promoted from associate to full professor were James J. Donaghy of the physics department, John K. Jennings of the journalism department, and J. Ramsey Martin of the philosophy department.

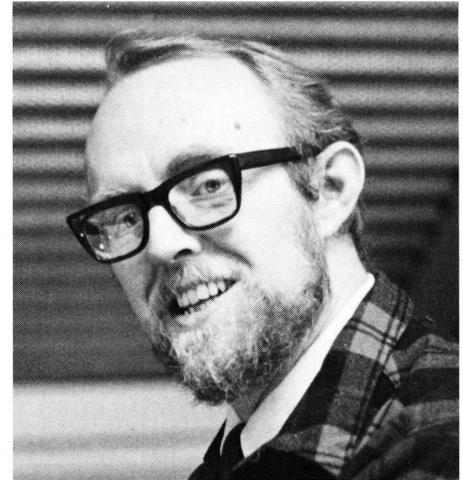

Promoted from assistant to associate professor were John R. Handelman of the politics department, John M. McDaniel of the sociology-anthropology department, Pamela Hemenway Simpson of the art department and H. Thomas Williams of the physics department.

Isabel McIlvain, the University's sculptor-in-residence, was promoted from instructor in studio art to assistant professor.

---

### More faculty news

Two W&L professors, Joseph B. Thompson of the psychology faculty and William Buchanan of the politics department, are the authors of a new text/workbook on applying statistical data

Dr. Joseph B. Thompson

to psychology. Their 310-page book, *Analyzing Psychological Data*, was published by Charles Scribner's Sons.

The book focuses on actual experimental research procedures and data because, the authors note, “we believe that early exposure to the practice of research and statistical evaluation of results is the best way to learn.” Topics covered in the book range from “research outside the laboratory” to ways of gauging the accuracy of statistical evidence.

Thompson is a Ph.D. graduate of the University of Wisconsin and has taught at W&L since 1966. Buchanan, a 1941 W&L graduate whose Ph.D. is from Princeton, returned to W&L in 1966 as head of the politics department. Among his books is *Understanding Political Variables*, similar to the new book he and Thompson wrote, also published by Scribner's (1969; revised edition, 1974).

Charles W. Turner, professor of American history, is the author of two articles on Virginia history—“Bishop William Taylor of Rockbridge—Bishop to the World,” published this summer in *South California Quarterly*, and “Virginia Central Railroad,” published in *Virginia Cavalcade*, the journal of the State Library.

S. Todd Lowry, professor of economics, is also the author of two recently published articles, “Recent

Literature on Ancient Greek Economic Thought," in the American Economic Association's *Journal of Economic Literature*, and "A Nightmare in Introductory Economics," in the *Journal of Economic Issues*, published by Michigan State University.

---

## Hoke wins NCAA scholarship

Harry Franklin Hoke III, a 1979 graduate of Washington and Lee, has been awarded a \$1,500 NCAA post-graduate scholarship. He will use the scholarship at the University of North Carolina, Chapel Hill, where he plans to obtain a doctorate in mathematics. He is the sixth W&L student-athlete since 1970 to receive the award and the second to be a swimmer. While at W&L, Hoke earned four varsity letters in swimming and two in water polo. He graduated second in a class of 305 and was the recipient of the Algernon Sydney Sullivan Medallion, awarded at commencement each year by the faculty to the graduate who excels in high living ideals, spiritual qualities, and generous service to others.

---

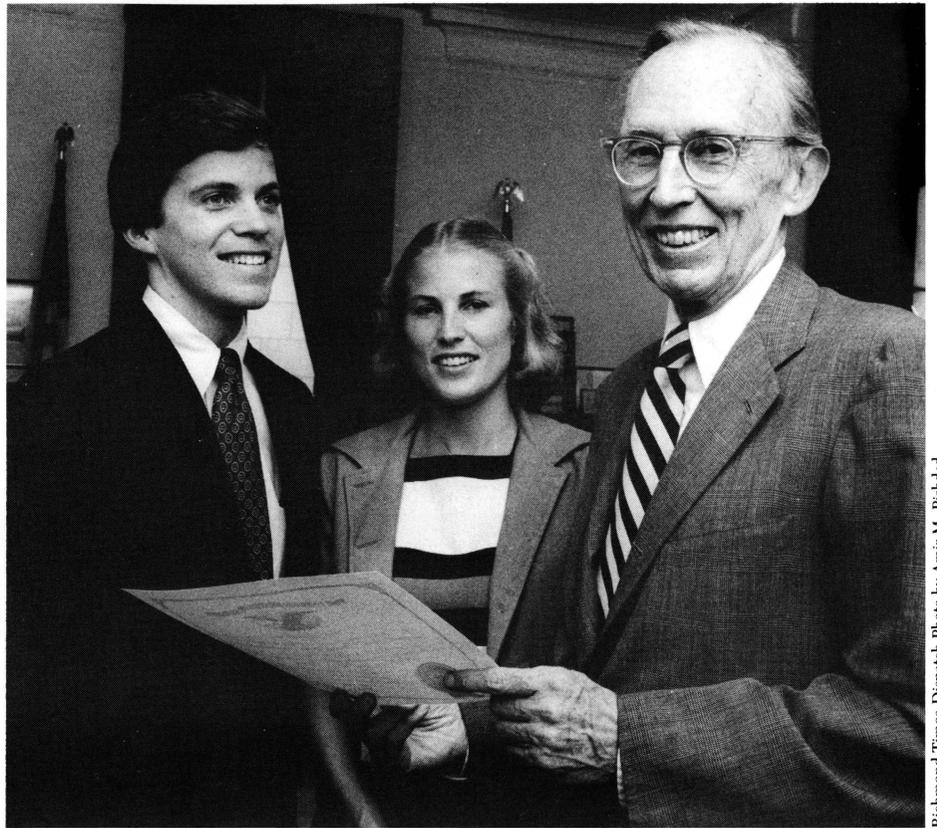

## '25 graduate returns as visiting lecturer

Among visiting scholars at W&L during the Spring Term was Dr. Herbert Pollack, '25, currently a special consultant to the State Department on radiation. He spoke on the topic "Moscow Microwave Radiation of the U.S. Embassy: Media Report and Actual Facts." Dr. Pollack, a retired professor of clinical medicine at George Washington University, was the first to measure acid base—pH—in a living cell. After graduation from Washington and Lee he earned his medical degree from Cornell and a Ph.D. in medicine at the University of Minnesota.

---

## Area radio workshop

The W&L journalism department sponsored a month-long program this summer for Lexington area high-school students in radio station management and operation. The students studied the techniques and problems of broadcasting management under Robert J. DeMaria, assistant professor of journalism and

Justice Lewis F. Powell Jr., '29, '31L, introduces his son Lewis F. Powell III, '74, and his daughter-in-law, Mims Powell, to U.S. District Court in Richmond.

manager of WLUR-FM, the University radio station. The students then applied their knowledge by actually operating WLUR six nights a week.

---

## Powell cites W&L ties in court appearance

Three Powells stood before the bench in U.S. District Court in Richmond one day this summer—one returning to an old haunt from his current position on the highest court in the land, the other two newly admitted to law practice.

U.S. Supreme Court Justice Lewis F. Powell Jr. (a 1929 B.A. graduate of Washington and Lee, and 1931 law graduate) told Judge Robert R. Merhige Jr. (a graduate of the University of Richmond): "It is possible you haven't heard anything too dreadful about them yet," the *Richmond Times-Dispatch* reported.

"They're both graduates of the University of Virginia law school."

"That has never stopped us from qualifying anyone before," Merhige replied.

Said Powell: "One went to Vanderbilt [daughter-in-law Mims Maynard Powell] and the other went to Washington and Lee [Lewis III, '74]. Does that help any?"

"That helps greatly," Merhige said.

Lewis Powell III, who is finishing a year as a clerk to Judge Merhige, is joining Hunton & Williams, the firm in which his father was a partner before being named to the Supreme Court. Mims Powell is entering the firm of McGuire, Woods & Battle. Both law firms are in Richmond.

---

## Changes in the administration

A Massachusetts man, Michael D. Bartini, is Washington and Lee's new director of student financial aid. He began work at W&L in August after three years as director of financial aid and assistant admissions director at Simon's Rock Early College in Great Barrington, Mass. (An "early college" is one which admits exceptionally qualified students midway in their high-school years.)

Bartini succeeds Van H. Pate, who became associate admissions director at W&L earlier in the summer. Pate had

directed the University's financial aid program for seven years.

Bartini is a 1976 economics graduate of Westfield (Mass.) State College. The financial aid program he administers at Washington and Lee will distribute approximately \$1.25 million in the 1979-80 academic year (about \$600,000 of it University funds; the rest in federal and Virginia Tuition Assistance program money).

John L. White, a 1974 graduate of W&L in sociology and philosophy, is the University's new coordinator of minority affairs. He returned to W&L after developing and administering the career development program at Trident Technical College, Charleston, S.C.

White, who earned his M.S. degree in guidance and counseling from Radford College, succeeds Curtis Hubbard, Washington and Lee's minority affairs coordinator for the past three years.

At Trident, White supervised two career development centers and produced 100 career information brochures and 25 audio-visual programs. Earlier, as student development counselor, he had created Trident's career center and developed all its resources.

At W&L he is adviser to the Student Association for Black Unity and also has charge of the University's minority-student recruitment activities. He also has broad general responsibilities in student affairs.

Two men, Peter M. Williams and W. Michael Hallman, have been named admissions counselors. Williams is a June graduate of the University with honors in history. Hallman comes to W&L from Southern Benedictine College in Cullman, Ala., where he was assistant admissions director. He is a B.S. graduate of the University of Alabama with a master's degree in counselor education from Virginia.

Williams and Hallman will have substantial responsibility for student recruitment on W&L's behalf. They will visit secondary schools, conduct on-campus interviews, and review applications for admission.

Edwin D. Craun, assistant dean of The College since 1976, has been promoted to associate dean. He is an associate professor of English. Craun, who received the Ph.D. in Renaissance literature from Princeton, has taught at W&L since 1971.

## Summertime faculty activity

Two W&L teachers, Gerard M. Doyon, professor of art history, and David R. Novack, assistant sociology professor, received National Endowment for the Humanities research grants this summer. The grant to Doyon enabled him to take part in a seminar on the images of Paris in modern art, which took place in Paris. Novack's grant was for participation in a seminar series on crime and punishment in America, held at the University of Virginia.

Doyon, whose Ph.D. is from Boston University, has taught at Washington and Lee since 1968. Novack earned his Ph.D. from New York University and joined the W&L faculty in 1976.

Pamela Hemenway Simpson, assistant art history professor, received a grant to support summer research and study in England from the Victorian Society In America. She spent three weeks at the University of London participating in a program there on the topic of 19th-century English architecture. Simpson has taught at W&L since 1973, the year she received her Ph.D. in art history from the University of Delaware.

Dr. Charles F. Phillips Jr., professor of economics, taught in a number of seminar programs for business executives this summer: a two-week session in the University of Michigan's Public Utilities Executives Program, a course for power-system marketing trainees sponsored by Westinghouse, a conference on utility planning sponsored by Planmetrics Inc. in Illinois, and a seminar for utility-company executives on "The Cost of Money" sponsored by Kidder, Peabody & Co. of New York City.

During the Spring Term, Phillips commuted weekly to the University of Michigan and to New Jersey (for an AT&T-sponsored graduate-study program administered by Pace University) to teach courses in public utility economics—in addition to teaching at Washington and Lee.

And a book edited by Phillips, *Regulation, Competition and Deregulation—An Economic Grab Bag*, the sixth in a series, was published by the University this summer. The volume contains papers presented at programs in 1977 and 1978 co-sponsored by W&L and

the Chesapeake & Potomac Telephone Companies. Phillips is currently organizing and directing the eighth in the annual W&L-C&P series, and another volume of papers is expected to be published next year.

## Fall sports schedule

### Football

Sept. 8—	Delaware Valley	Away
Sept. 15—	Emory & Henry	Away
Sept. 22—	Centre	Home
Sept. 29—	Randolph-Macon	Away
Oct. 6—	Fordham (Homecoming)	Home

## LIBERTY HALL DIG IS UPDATING HISTORY

Life at Frontier  
School Is Found  
To Be Far From  
Crude and Isolated

*Documented drawing of how Liberty Hall looked before it was destroyed by fire in January 1803*

The archaeological excavation at the ruins of Liberty Hall Academy entered its fifth—and final—season this summer, and some of the conclusions the researchers have drawn are surprising.

Perhaps the most significant finding is that, despite traditional representations, life 200 years ago at the supposed “frontier” west of the Blue Ridge was far from crude and isolated. The archaeological evidence demonstrates that the people who taught and studied at Liberty Hall in the years 1779 to 1803 enjoyed a sophisticated, secure life.

Liberty Hall, which of course evolved into Washington and Lee, had its campus about a mile west of today’s W&L. The archaeological “dig” began there in 1974, under the direction of Dr. John M. McDaniel, associate professor of sociology and anthropology and a broadly experienced field archaeologist.

That the site had remained undisturbed for 171 years since a fire gutted the main building in 1803 was exciting because it was unusual, perhaps even unique. There are not many colleges that trace to the 18th century at all, and those few generally built up (or other things were built) on their original sites.

More than 200 students have been involved in the “dig.” Funds to support the project have come from the University, from the Virginia Bicentennial Commission (the project was begun as a Bicentennial activity), from “Earthwatch,” a national clearinghouse for educational on-site explorations, and from several foundations and individuals.

During the course of the project, the sites of nine Liberty Hall structures have been located. Seven of them were unknown when the dig began.

More than 20,000 artifacts were found and catalogued. It is primarily the analysis of these that led to the important conclusions about the relatively comfortable mode of life at 18th-century Liberty Hall. Most of the personal-use and domestic items, buttons and eating utensils for example, were imported rather than locally fashioned, and they were much more elegant in ornamentations than items found at other “frontier” excavations. The virtual absence of gun-related artifacts, too, led the researchers to conclude that the stereotype of frontiersmen having constantly to defend themselves against attacks from savage bands of marauding Indians was largely a figment of romantic imagination.

The dig has been essentially concluded, and the analysis of data and supporting documentary research have been completed. Dr. McDaniel and some

of his students have written a scholarly monograph, *Liberty Hall Academy: The Early History of the Institutions Which Evolved Into Washington and Lee University*, being published this summer by W&L’s “Liberty Hall Press” to mark the 200th anniversary of the Academy’s move from Timber Ridge to its site on Mulberry Hill where the familiar ruins now stand.

The 72-page paperbound book will be available from the W&L Bookstore for \$1 postpaid. This article is excerpted from two sections of the monograph, “The Archaeological Data and Campus Life” and “Mulberry Hill and Cultural Change.”

### New Interpretations

The data resulting from the Liberty Hall excavation have led to new interpretations which contrast vividly with the themes of isolation, harshness, crudity and danger that dominate traditional histories.

Our analysis indicates that many of the implements used at Liberty Hall were imported. We have ceramics from England and China, gunflints from France, pipes from Holland, coins from South America, and metal buttons from England, to name several examples. In a 757-square-foot area immediately outside the Liberty Hall building itself, we uncovered 4,492 ceramic shards. Ninety-nine percent of the pieces were of non-domestic origin. All our data support the hypothesis that economic and cultural isolation did not prevail. On the contrary, it is evident that there was ready access at Liberty Hall to imported goods. The evidence demonstrates that the perception of a predominantly self-sufficient economy at the western “frontier” in which the only goods were homespun is fallacious—at least when applied to Liberty Hall.

Not only was there routine access to imported wares; they reached Mulberry Hill from seaports in a relatively short period of time—only weeks or, at most, several months, as we discovered through application of sophisticated dating techniques to 4,198 ceramic shards.

Their reliance on imported commodities should not be interpreted, however, as an indication that the Scotch-Irish at Liberty Hall lacked industrial capabilities themselves. The brick kiln discovered near the ruins is testimony to the technological skills of members of the community; the precision with which the locally quarried limestone was worked indicates the talent they developed in a related field. From the cultural perspective, the significant point is that

the Liberty Hall population included capable and imaginative craftsmen. This inventory of skills contradicts the stereotype of the limited range of talents possessed by the “rough, crude” Scotch-Irish settlers.

Widely accepted is the view that the Scotch-Irish had little interest in, or appreciation of, aesthetics. Our archaeological data, however, suggest strongly that this notion is at least an exaggeration and is probably false. It is apparent that aesthetic considerations were important in the choice of many commodities. The buttons discovered at the site offer a good example. We found simple buttons of bone and wood—but they are far outnumbered by highly decorated English metal alloy buttons. The quality and refined designs of ceramics and flatware provide evidence of concern for an attractive table. Function was not sacrificed to elegance, but in many cases a decorated piece was chosen when a plain item would have been equally useful. Many decorations on pieces found at Liberty Hall bear intricate patterns.

In considering the question of the extent to which the situation at Liberty Hall was dangerous, it is instructive to examine the artifacts excavated at forts known to have been in high-risk areas. To note a few examples, the Fort Prince George site in South Carolina produced 393 balls, shot, and sprue, 40 gunflints and spalls, and 38 gun parts; even more impressive are the 1,820 arms-related artifacts excavated at Fort Ligonier in Pennsylvania. At Liberty Hall, the inventory of arms-related artifacts consists

Dr. John M. McDaniel (right) explains early phases of the dig to a visitor.

of 17 gunflints, three lead shot, and one gun part. Even that comparatively modest total of 21 artifacts should be examined in the context of the fact that most of the gunflints were found in, or just outside, the main academic building, in which laboratory equipment was maintained; it is possible that these flints may have been used not on firearms but rather in connection with laboratory apparatus.

The variety of artifacts of items used for domestic purposes helps make a good case for the assertion that Liberty Hall was not in a high-risk area; such areas usually lack these commodities in any abundance.

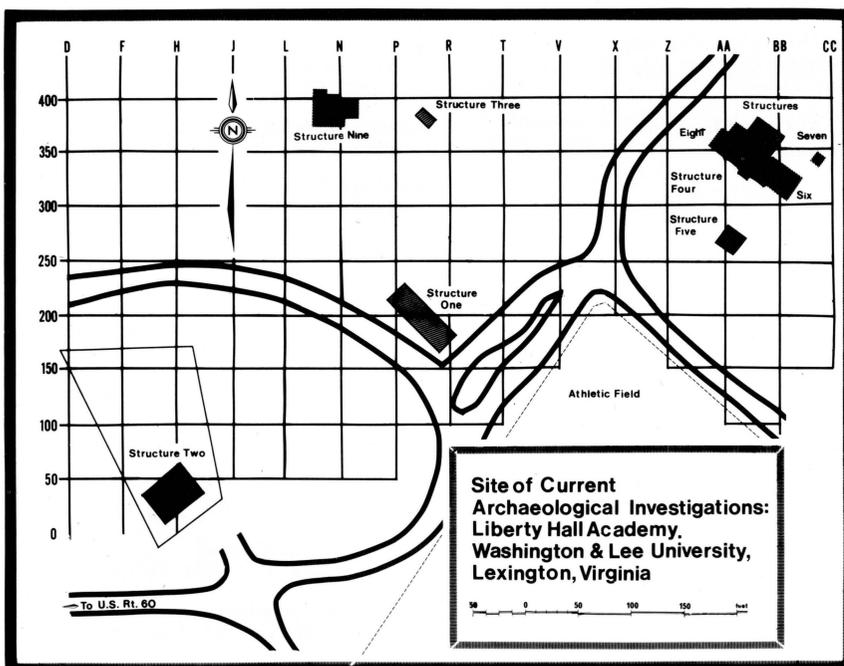

The excavation of academic tools—writing slates, styluses, and ceramic inkwells, to name some examples—has

increased our knowledge of the nature of instruction at Liberty Hall by providing useful clues about pedagogical techniques. The written record does not often provide such information, and one of our goals, therefore, has been to use artifacts to help determine with greater accuracy what was taught—and how. The discovery of a fine vernier scale, part of a larger surveying implement, for instance, indicates that sophisticated equipment was employed in teaching surveying techniques.

The nature of the artifacts excavated at Liberty Hall suggests that the community there was relatively affluent. Bills and inventories demonstrate that many of the most popular imported commodities purchased at Liberty Hall were comparatively expensive. It is evident that by 1782 the population at Liberty Hall included a substantial number of members who were capable of spending considerable sums on expensive goods.

The archaeological data provide numerous insights into life on Mulberry Hill between 1779 and 1803. We can now state with confidence that the Mulberry Hill school was neither economically and culturally isolated nor defined by a crude, harsh, dangerous style of life. On the contrary, it was a secure center of learning whose members had relatively easy access to goods and to news. Moreover, the archaeological data provide important evidence of the interests, capabilities, worldliness and economic activities which characterized the Scotch-Irish who studied and taught at Liberty Hall.

Our investigations indicate that in at least one respect, the traditional picture of the culture of the eighteenth-century Scotch-Irish American living west of the Blue Ridge demands re-interpretation.

Site plan showing the locations of the nine structures discovered.

# W&L'S MISSIONARIES

## 60 Alumni Have Served Abroad as Teachers, Doctors, and Evangelists

Washington and Lee has been well represented by her alumni more than a century in the field of foreign missions. The University's records show that 60 W&L men have served overseas as missionaries in a number of countries.

More than half the W&L missionaries, 31 of 60, worked in China as teachers, doctors and evangelists. Fifteen others went to Japan, Korea, the Philippines, and other Far East countries; five went to the Belgian Congo (Zaire); two went to Brazil, and two to Greece.

The majority of the missionaries, 53, were Presbyterians. Six were Episcopalians, and one was Methodist.

Fifteen of the 60 were from Lexington or Rockbridge County.

The first Washington College missionary was George William Leyburn of Lexington, a member of the class of 1827. He and his wife went to Greece to join friends there, and were stationed on the island of Scio off the coast of Asia Minor. They conducted an elementary

school as a means of attracting interest in their Christian message. The Leyburns reported back to the Lexington Presbytery that the Greek children took a considerable interest in the school—but not in the Protestant religion. The Greek people, they said, held fast to their Orthodox doctrine and form of worship.

Absalom Sydenstricker, an 1878 graduate, served in China; his daughter was Pearl Buck, the author of many books of fiction, including *The Good Earth*, about that land. William McCutchan Morrison, '87, achieved international recognition for two important accomplishments—his extraordinary courage in exposing the notorious Belgian atrocities committed by Congo rulers to wrest ivory and rubber from the natives, and his translation of the Scriptures into the native tongue of the Congolese.

William McElwee Miller, '12, asked for a difficult assignment—and received it. He spent 40 years in Iran, striving zealously to make an impression on the

Muslims.

It was approximately a hundred years ago that the appeal to carry the Gospel to the ends of the earth swept through the churches of the United States and Great Britain. The Student Volunteer Movement in American colleges and universities became an important part of the call to mission; students at Washington and Lee during the 1913-14 session will never forget the "Mott Campaign" which brought Dr. John R. Mott and his powerful appeal to the campus for several addresses. Francis Pickens Miller, Ted Schultz and Frank Johnson Gilliam were the student leaders of the campaign.

The last name on the list is that of David Richard Hunter, who was graduated from Washington and Lee exactly a century and a half after George W. Leyburn and, like him, was a Lexington native. David Hunter is serving in the Mediterranean port cities, not far from the Greek island where the Leyburns began their preaching and teaching so long ago.

## GENERAL LEE'S CLOCK

Alumnus Offers Measured Drawings of Heirloom; Sales to Benefit W&L

Timepieces all work on the same principle, counting the number of times some extremely regular event takes place. In a grandfather clock, it's the swing of a pendulum; in an Accutron, the vibrations of a tuning fork; in a Quartz watch, the natural electronic frequency of a crystal. Atomic clocks count the electronic resonances of atoms excited by radiation.

To some people, all of this is inconsequential, because, to them, there is no such thing as time. These people—you surely know a few—are likely to be late to their own funerals and are always late for the premier of a television program or movie and pester friends with questions about what happened before their arrival, diverting your attention from what has occurred since they arrived.

Yet, there are people—myself included—who are committed to time. We believe that time is the *only* thing there is. We thus busy ourselves with the riddle, how best to kill it?

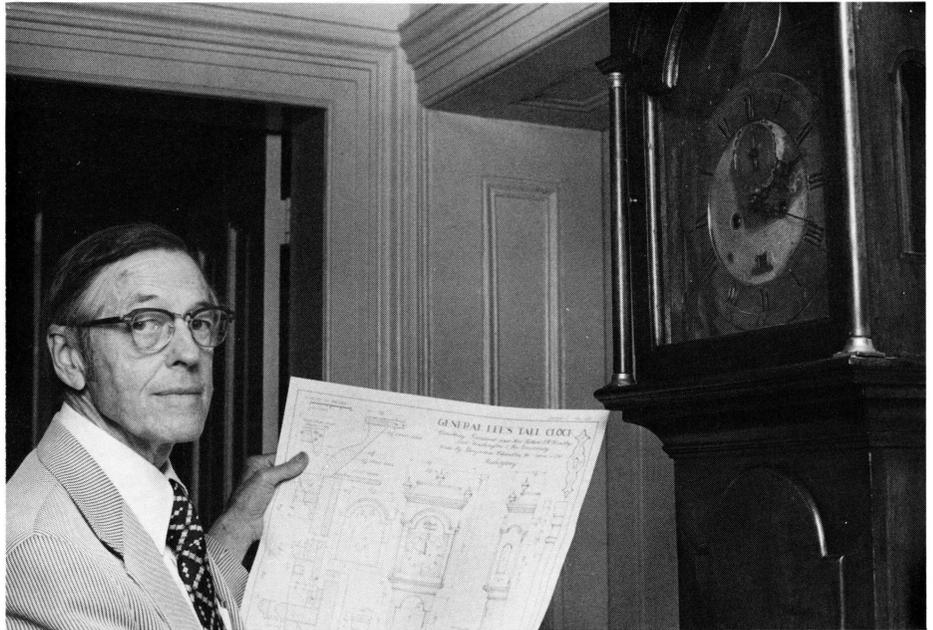

E. Carlyle Lynch of Broadway, Va., a 1932 graduate of Washington and Lee University, has an answer, and a challenge, for those who are slaves to killing time—build a replica of the cabinet of General Lee's Clock.

Lynch, a well-known drafter of plans of antique furniture for school-shop instruction and home-workshop craftsmen, has included the Lee Clock in his one-piece furniture plans currently on the market.

Handmade from mahogany by Benjamin Chandlee in 1730, the Lee Clock is part of the furnishings in the President's House, which was built on the southeast side of the University's front campus during the time that Lee was president of Washington College.

Lynch, former instructor at Washington and Lee, taught courses in mechanical drawing in W&L's department of engineering in 1942 and was superintendent of buildings and grounds until 1947. He is offering the proceeds from the sale of these Lee Clock cabinet plans to his alma mater. (*Please note information on price and ordering instructions which accompany this article.*)

The plans—which, by the way, make attractive posters, for those with unskilled

E. Carlyle Lynch, '32, is shown with Lee Clock and his measured drawing of it.

hands—are being printed by Woodcraft Supply Corporation in Woburn, Mass. The president of the company is another Washington and Lee graduate, Rodgers G. Welles, '48. In addition to sales through the mail, the plans are being offered for sale in Lee Chapel.

Lynch, a minister's son, studied mechanical drawing and drafting in Washington and Lee's department of engineering, but majored in English. He now says his studies in engineering were the most "thrilling part of my college career."

He says he has always worked with his hands. He worked his way through Washington and Lee by attending the furnaces at many of the University's fraternity houses, and he recalls his father once saying to him, "You'll work with them all of your life, 'cause your head ain't big enough to do it." (Lynch was later, in 1938, to found the industrial arts department at Lexington High School.)

Lynch's interest in antique furniture and his desire to preserve the art of the craftsman resulted in a compilation of his measured drawings into a book, *Furniture Antiques Found in Virginia*, published in 1954 and reprinted a number of times until 1974. Many of his one-piece furniture

plans of furnishings found in Sturbridge, Mass., which he calls the "Williamsburg" of that state, are currently being published.

In addition, he has designed furniture for the Virginia Craftsmen in Harrisonburg, designed furnishings for the DuPont Hotel in Wilmington, Del., and has taught industrial arts in Broadway, Va., high school, a position from which he retired in 1971.

In the movie *Dark Victory*, Bette Davis lamented about time—she didn't have much left—while Vera Van sang, with irony, in the background, "Oh give me time. . . ."

In a sense, Lynch is giving time to Washington and Lee. His drawings of the Lee Clock—along with his drawings of antique furniture everywhere—will help to preserve that bit of time which always seems to mean the most to us: the past.

*The measured drawings of the Lee Clock may be obtained by sending your order to E. Carlyle Lynch, Rt. 1, Box 404, Broadway, Va. 22815. The drawings are \$8 each. Make checks payable to Washington and Lee University.*

# 1978-79 ANNUAL FUND

## Donations Near \$1 Million as Average Gift Reaches All-Time High of \$170

The 1978-79 Annual Fund reached an all-time high of \$977,333 in gifts from alumni, parents and friends—\$174,894 more than last year's record-setting total of \$802,439. The average gift also hit an all-time high of \$170, up from last year's record high of \$142. The number of donors rose from 5,692 last year to 5,788.

Leadership for the 1978-79 Annual Fund was provided by C. Royce Hough, '59A, Annual Fund chairman and Academic Alumni chairman. Assisting him were William F. Ford, '61L, Law Alumni chairman; John H. Van Amburgh, Current Parents chairman; W. Martin Kempe, Past Parents chairman; and Everett Tucker Jr.,

Robert E. Lee Associates chairman.

The 1978-79 Annual Fund covered 8 percent of the University's educational and general budget. In 1978-79, 309 alumni, parents and friends contributed at the Lee Associates level (\$1,000 or more), 62 more than last year, and 2,163 at the Colonnade Club level (\$100-999), 290 more than last year. Although Lee Associates and Colonnade Club givers comprised only 42 percent of the donors, their contributions amounted to 89 percent of the Fund.

This year, three reunion classes achieved particularly outstanding results.

The Class of 1949 Academic and Law contributed more than two-and-a-half

times as much as last year; \$53,481 this year, compared to \$20,476 last year.

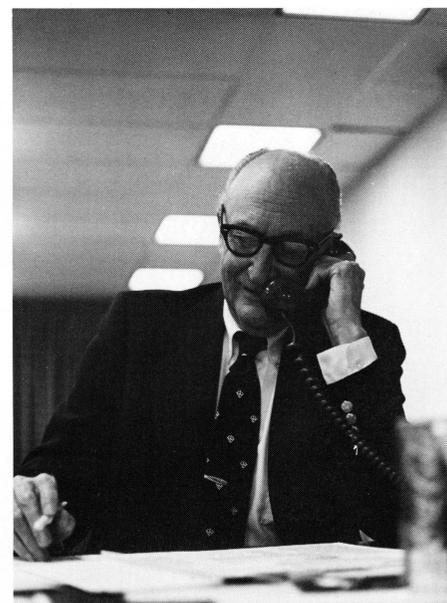

The Class of 1954 Academic and Law contributed more than twice as much as last year; \$53,924 this year, compared to \$24,346 last year.

The Class of 1929 Academic and Law not only nearly doubled its gift of last year—\$14,888 this year, compared to \$8,355 last year—but also presented the University with a capital commitment of \$50,000.

Overall, the Fund showed an increase of 22 percent over last year in dollars, despite an increase of only 2 percent in the number of donors.

Student Phonathon participants who this year raised \$25,505 in pledges compared with \$19,678 last year. In all, 31 students took part in the effort.

T. Graham Gibson, '29A Class Agent, makes call during 1978-79 Phonathon, which raised \$43,053 in pledges.

# CHAPTER NEWS

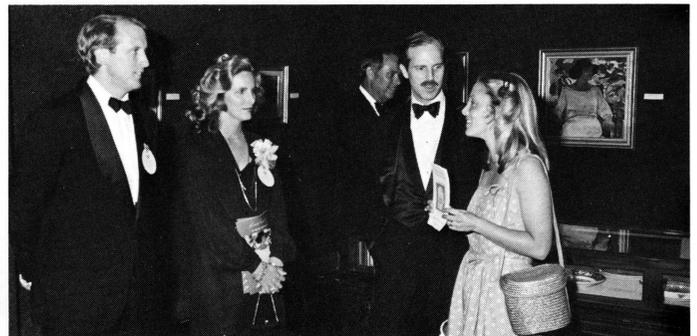

CHARLESTON—At reception are Andrew Eugene Geer III, '83; Dr. A. Bert Pruitt Jr., '56; J. G. Blaine Ewing III, '67, who helped make the arrangements, and T. Patton Adams IV, '65.

CHARLESTON—James W. Whitehead welcomes W. R. Reeves, brother of Euchlin Reeves, and his wife at the Mills Hyatt House reception.

CHARLESTON—James W. Whitehead, curator of the Reeves porcelain and Herreshoff paintings, addresses alumni at the reception. At the table is his wife Celeste.

CHARLESTON—At the Gibbes Gallery are Rutherford P. C. Smith, '68, '74L, his date, and A. Lee Shapleigh III, '66, and his wife.

CHARLESTON. A large group of alumni, many accompanied by their wives or dates and other guests, attended a black-tie reception at the Mills Hyatt House in Charleston on May 17 in connection with the opening at the Gibbes Art Gallery of a combined exhibition of the University's Reeves Collection of Chinese Export Porcelain and the paintings of Louise Herreshoff. The event came a few days before the beginning of Charleston's annual Spoleto Festival U.S.A. James W. Whitehead, University treasurer and curator of the Reeves and Herreshoff collections, lectured at the museum about the exhibit and also spoke briefly to the alumni at the reception about the 1967 gift that brought the famed collections to Washington and Lee. After the reception, the W&L group walked a half block to the Gibbes Gallery, where they joined a large group of museum members and patrons at the exhibit opening. The collections have special interest for South Carolinians since Euchlin Reeves, '27, who with his wife

Louise Herreshoff Reeves assembled the porcelain, was born and reared in the Palmetto State. Special guests were members of the Reeves family, including W. R. Reeves of Columbia, Euchlin Reeves's surviving brother, and his wife. Whitehead developed both collections after the Reeveses gave them to the University; he brought to the attention of the art world the splendid paintings of Louise Herreshoff and is an expert in the field of 18th-century Chinese export porcelain. He was accompanied to the exhibit by his wife Celeste, who has collaborated with him in the development of the collections. Arrangements for the W&L gathering were made by J. G. Blaine Ewing III, '67, and John Hollister, '58, a development staff associate, who was accompanied by his wife. Also representing the University were Farris P. Hotchkiss, director of development, and

his wife; Leroy C. Atkins, '68, assistant alumni secretary, and his wife; and Romulus T. Weatherman, director of publications, and his wife. The exhibit at the Gibbes Gallery was the fourth combined showing of the Reeves/Herreshoff collections. Previous exhibits were at Museums of Arts and Science in Columbia, at the Henry Morrison Flagler Museum in Palm Beach, and at the Cummer Gallery in Jacksonville.

SOUTHERN OHIO. Chapter members and guests gathered for cocktails and dinner at the Cincinnati Country Club on June 19. Arrangements for the dinner were made by Robert W. Hilton, '39, and Mrs. Hilton. Thomas P. Winbourne, '51, chapter president, presided over a meeting which followed the meal. Special guests of the chapter were President Robert E. R. Huntley and Mrs. Huntley, Milburn K. Noell, '51, staff associate from

**CHARLESTON**—Alumni and Gibbes Gallery patrons are absorbed in examining pieces from the Reeves porcelain collection. Herreshoff paintings are in the background.

**WINCHESTER**—Director of Development Farris P. Hotchkiss, '58, (center) makes informal talk to alumni on the development campaign and the admissions program.

**WINCHESTER**—At the gathering at the home of Dr. William H. Pifer, '47, are Tom Holden, '67, his wife Gina; David Andre, '64, '67L, his wife Shirley, and Jay Wetsel, '70.

**MID-SOUTH**—Among the guests at the Pig Roast were Mrs. Jerome Turner, Jody Brown, '65; representatives of other Virginia colleges, and Jerome Turner, '64, '66L, (extreme right).

Memphis, and Mrs. Noell, and W. C. Washburn, '40, alumni secretary, and Mrs. Washburn. Also in attendance was Pete Williams, '79, who is working this year on the University's admissions staff. Dr. James Priest, '43, former president of the Alumni Association, presented the chapter's officers for next year—Smith (Skip) Hickenlooper III, '64, was elected president and Paul Hunt, '70, vice president. President Huntley spoke about Washington and Lee's involvement in the contemporary educational scene.

**WINCHESTER.** A cocktail party was given at the home of Dr. William H. Pifer, '47, on June 2 for alumni from the Winchester, Berryville, Front Royal area. Farris P. Hotchkiss, director of development, attended the event and discussed with the alumni the University's undergraduate admissions program and

the progress of the development campaign. William C. Washburn, '40, alumni secretary, also attended. Arrangements for the gathering were made by Mrs. Pifer, Jay Denny, '73, John (Jay) Wetzel Jr., '70, and Richard W. Pifer, '72. (The alumni expressed considerable interest in the formation of an organized chapter of the Association, suggesting it be named the Shenandoah Chapter. Jay Denny was named president pro-tem.)

**CLEVELAND.** Chapter members attended a meeting at the Union Club in Cleveland on June 18. Arrangements for the event, which included a cocktail and dinner program, were made by Sid Kaplan, '56, chapter president. Special guests of the chapter were President Robert E. R. Huntley and Mrs. Huntley, Milburn K. Noell, '51, staff associate from Memphis, and Mrs. Noell, and W. C. Washburn, '40, alumni secretary, and Mrs. Washburn. President Huntley spoke to the gathering about the predicament of

education in America today and Washington and Lee's role in relation to that. He also praised the chapter members for their outstanding support to the University over the years. Also in attendance were William P. Boardman, '63, '69L, president of the Alumni Association, and Mrs. Boardman, and Philip Brasfield, '56. A chapter meeting is planned for late summer to welcome incoming freshmen from the area.

**MID-SOUTH.** An "Old Dominion Pig Roast" took place on May 19 at the home of Jerome Turner, '64, '66L, at Colliersville, just north of Memphis. Alumni and alumnae of Hollins, Mary Baldwin, Randolph Macon, Sweetbriar, and W&L gathered for the event which included volleyball matches, and conversation accompanied by assorted tunes from the Benny Goodman era to the Bee Gees.

# CLASS NOTES

## THE WASHINGTON AND LEE ARM CHAIR AND ROCKER

*With Crest in Five Colors*

The chair is made of birch and rock maple, hand-rubbed in black lacquer with gold trim. It is an attractive and sturdy piece of furniture for home or office. It is a welcome gift for all occasions—Christmas, birthdays, anniversaries, or weddings. All profit from sales of the chair goes to the scholarship fund in memory of John Graham, '14.

### ARM CHAIR

*Black lacquer with cherry arms*

\$85.00 f.o.b. Lexington, Va.

### BOSTON ROCKER

*All black lacquer*

\$70.00 f.o.b. Lexington, Va.

*Mail your order to*  
WASHINGTON AND LEE ALUMNI, INC.  
*Lexington, Virginia 24450*

Shipment from available stock will be made upon receipt of your check. Freight charges and delivery delays can often be minimized by having the shipment made to an office or business address. Please include your name, address, and telephone number.

## 1925

THE REV. HERMAN J. WOMELDORF, though retired for more than six years, is serving as minister to a Presbyterian church on Edisto Island, S.C.

## 1927

GEORGE W. SUMMERSON, president and general manager of Abingdon Inns Corp. which operates the Martha Washington Inn in Abingdon, Va., is retiring Oct. 31, 1979. For the past 24 years Summerson has been president of Abingdon Inns Corp. and general manager of the Martha Washington Inn. Summerson began his career in hotel management in 1929 as general auditor for the Robert E. Lee Hotel in Winston-Salem, N.C. His subsequent managerships have included Washington Duke Hotel in Durham, N.C., the General Shelby Hotel and Hotel Bristol in Bristol, Va., and since 1956 manager of the Martha Washington Inn. Among his professional activities he is a past president of the Virginia Hotel Motel Association in 1948, the American Hotel Association 1949, and the Virginia Travel Council 1951. He is a former director and vice president of the Virginia State Chamber of Commerce; past mayor and member of the Bristol, Va., City Council; former mayor of Abingdon, Va., and a former member of the Virginia Statewide Health Coordinating Council. Among his many awards are VFW's Outstanding Citizens Award of Bristol, the City of Bristol's Certificate of Recognition for dedicated public service, the 1971 Virginia Motel Association's Distinguished Service Award, the Virginia Bicentennial Spruce-Up Campaign Award of 1976, and the Certified Hotel Administrators Award by the Educational Institute of American Hotel and Motel Association.

## 1930

CHARLES VAN HORN has retired from B&O Railroad and Chessie System after 49 years of service, the last 25 years of which he was in Washington as assistant vice president and executive representative. He is now doing consulting work for a number of private companies.

## 1932

DR. EDWARD E. FERGUSON of Southwest Harbor, Maine, is a director of the Maine Coast Memorial Hospital.

JAMES S. POLLAK, author of *The Golden Egg*, a best-seller book some years ago, is writing another book. Pollak is also involved in the motion picture business and resides in Sherman Oaks, Calif.

## 1933

R. B. ARMISTEAD, having retired four years ago, continues to travel extensively in the U.S. and Canada.

GEORGE H. STROUSE JR. has retired after practicing law in Norwich, Conn., for 45 years. He served

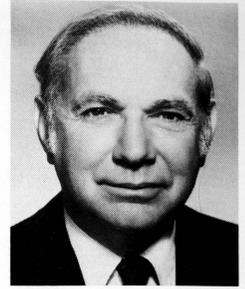

## BAR ASSOCIATION HONORS POWELL

Lewis F. Powell Jr., '29, '31L, will be honored with the American Bar Association Gold Medal at the ABA's annual meeting this summer in Dallas.

Powell—a member of W&L's Board of Trustees from 1961 to 1978—is the 44th recipient of the award, given for "conspicuous and outstanding service to the cause

of American jurisprudence."

Among previous recipients of the ABA Medal was the late Ross L. Malone, '32L, one of Powell's fellow W&L board members (from 1967 until his death in 1974), Rector of the Board in 1973-74. Powell and Malone were presidents of the American Bar Association as well.

T. A. Bruinsma, '41

as clerk of the state Senate in 1943, as Deputy Judge of Norwich Police Court 1951-55, and was counsel for the town and several banks.

JOHN FRANCIS WATLINGTON JR., retired chairman of the Board of Wachovia Bank and Trust Co. of Winston-Salem, N.C., was presented the Award of Merit by the Asheville (N.C.) School during the School's graduation exercises on May 26. The award recognizes service to the School or to education in North Carolina or the Southeast. Watlington is a former trustee of the Asheville School (1966-69), a former trustee of Union Theological Seminary, and past chairman of the Board of Visitors of Bowman Gray School of Medicine. He is a director of several regional and national corporations and past president of the North Carolina Citizens Association whose citation for distinguished citizenship he received in 1978.

### 1936

HARRY J. BREITHAAPT JR. has been named vice president of law for the Association of American Railroads, in Washington, D.C. He had been vice president and general counsel of the association.

### 1937

PARKE ROUSE JR. has published another historical book, *Endless Harbor*—the history of Newport News. It is an updated edition of an earlier volume by Rouse, first published in 1969 by the Newport News Historical Committee. Rouse is the author of at least 10 books chronicling Virginia's social and historical past. He is the executive director of Jamestown Foundation and the Virginia Independent Bicentennial Council Fund.

### 1940

FRED SHELLABARGER was selected as this year's "Outstanding Professor" by the students of the College of Environmental Design at the University of Oklahoma where he teaches architecture. He expects to retire in 1981 and has invested in a condominium in Santa Fe.

### 1941

The Charlotte *Observer* recently recounted in a feature article the World War II flight experiences of HUGH ASHCROFT, president of Harris-Teeter Corp. in Charlotte, N.C. One of his experiences over Germany as pilot of the B-17 bomber, *Southern Comfort*, inspired the song "Comin' In On A Wing And A Prayer."

THEODORE A. BRUINSMA of Los Angeles has been appointed the 11th Dean of Loyola Law School. Following graduation from W&L, Bruinsma received a degree of industrial administration in finance and accounting from the Harvard Business School in 1943 and later graduated from the Harvard Law School in 1948 where he was awarded the Austin Fellowship for Scholastic Honors. Bruinsma's business and professional background has included positions as president of Harvest In-

dustries Inc., a Los Angeles agribusiness firm from 1969-78, past executive vice president and president of Lear Jet Industries Inc., of Wichita, Kan., between 1966-68, and executive vice president of Packard Bell Electronics Corp., Los Angeles, in 1964-66. Prior to entering business Bruinsma practiced law as senior attorney for the New York firm of Whitman, Ransom & Coulson and was general counsel for McCall Corp. of New York. He has been active in various civic and political affairs and is a former board member of the San Pedro Peninsula YMCA, the South Bay Boy Scouts of America and the Los Angeles Citizens Committee for Rapid Transit. Bruinsma served as a lieutenant commander in the U.S. Navy Reserve from 1943-46 and 1950-51.

### 1941

JOSEPH T. LYKES JR., chairman and chief executive officer of Lykes Bros. Steamship Co. Inc., has been named the 1979 recipient of the AOTOS (Admiral of The Ocean Sea Award). The award given annually since 1970 is for distinguished service to the American maritime industry. ---

## IN MEMORIAM

---

### 1914

ARCHIBALD CHAPMAN BUCHANAN of Tazewell, Va., a former justice of the Virginia State Supreme Court, died May 3, 1979. He had served as judge of Virginia's 27th Judicial Circuit from 1927 until 1946 and as a justice of the State Supreme Court from 1946 until 1969. He was also mayor of Tazewell from 1917 until 1921. Judge Buchanan received an honorary Doctor of Laws degree from W&L in 1949. He was a member of the board of trustees of Hampden-Sydney College, Mary Baldwin College, and Union Theological Seminary.

### 1920

JOHN WILSON DRYE JR., senior partner of the New York law firm of Kelley, Drye & Warren, died May 1, 1979. He was general counsel and a director of Union Carbide Corp. as well as a director of the Brooklyn Union Gas Co., the Continental Corp., and the Warner-Lambert Pharmaceutical Co. Drye was president of the Juilliard Musical Foundation and a director of the Juilliard School and the Metropolitan Opera Association. He also was a director and member of the building committee of Lincoln Center for Performing Arts.

ROBERT G. KELLY, Charleston lawyer and outdoorsman, died June 11, 1979. Kelly was senior partner in the firm of Jackson, Kelly, Holt & O'Farrell, which he joined in 1931. In 1975, he was selected the nation's outstanding coal lawyer at the National Coal Association's Coal Lawyers Conference. He was on the board of directors of Kanawha Valley Bank, Carbon Industries, Kentucky Carbon Corp., Vann Industries, Connelton

Industries, and Maple Meadow Mining Co. He was a past chairman of the board of West Virginia Water Co., and past member of the West Virginia Conservation Commission and the Kanawha County Airport Committee. Kelly was also a former state chairman of the Democratic Party, and in 1940 was a delegate-at-large to the Democratic National Convention. He served two terms as president of the West Virginia Chamber of Commerce and three terms as a director of the U.S. Chamber of Commerce. Kelly also hunted and fished around the world and in 1961 he wrote a book, *Trout, Trails and Tigers*.

### 1925

WILLIAM E. BROCK JR., chairman of the Brock Candy Co., died June 1, 1979, in Chattanooga, Tenn. He joined the company, founded by his father, in 1924 and served for many years as president of the firm before becoming chairman. Brock was the father of Paul K. Brock, '54, president of the Brock Candy Co., and William E. Brock III, '53, Republican National Chairman. Brock played an active role during Chattanooga's public school desegregation crisis in 1962 and because of his efforts he received the B'nai B'rith's Distinguished Service Award. For many years he had been a member of the National Confectioners' Association and served as vice president and chairman of many of its committees. In regional business circles he was on the board of directors of the Hamilton National Bank and the Provident Life and Accident Insurance Co. He was associated with the Chattanooga Manufacturers Association and was a director of the Greater Chattanooga Chamber of Commerce. In 1965 he was named the recipient of the Kiwanis Club's Service Award. A well-known layman and Sunday school teacher, Brock served as vice moderator of the session of elders of Lookout Mountain Presbyterian Church.

### 1926

CHARLES P. SNYDER, a retired Admiral of the U.S. Navy, died June 1, 1979. He resided in Pomona, Calif.

### 1936

E. ANGUS POWELL, chairman of the Richmond (Va.) Federal Reserve Bank's board of directors, died May 19, 1979. Powell also was associated with Lea Industries Inc., an area furniture and box manufacturing company, and with a land development project in Chesterfield County. He was president of Lea Industries from 1951 to 1970 and was named chairman of the board in 1970. He was president and board chairman of the Chesterfield Land and Timber Corp. from 1959 to 1977 when he became board chairman of Midlothian Development Corp., the successor corporation. Active in state education, Powell was a member of the Longwood College board for 10 years. He was a 16-year member of the board of The Collegiate Schools and served as the organization's president from 1959 to 1962. He was also active in civic affairs, serving as president of the board of the

Metropolitan YMCA for two years, co-chairman of the fund raising campaign for Westminster Canterbury House, a retirement home sponsored by Episcopal and Presbyterian denominations. In 1972 Powell was awarded a silver Brotherhood Medallion by the National Council of Christians and Jews.

### 1939

BAGLEY MEREDITH TROTTER JR., who for many years was personnel director for Vanderbilt University in Nashville, Tenn., died June 2, 1979. Trotter was an auditor for the State A.B.C. Board.

### 1941

DR. FREDERICK A. RUSCH, a dentist in Anaheim, Calif., died April 7, 1979. Rusch was an advisory director of Barclays Bank and a director of Orange County Dental Society.

### 1942

CHRISTOPHER C. BARNEKOV, formerly of McLean, Va., died on Feb. 12, 1979, in Clearwater, Fla. Before his retirement in 1973 from the federal government, Barnekov traveled extensively throughout Europe and Africa as a geographic attache. During World War II, he served with the U.S. Navy Reserve in the Pacific. He retired with the rank of captain.

### 1949

CARLTON HANSON KISER, a vice president with Chubb & Son Inc. of Short Hills, N.J., died May 8, 1979. Kiser joined Chubb & Son in 1949 as a claims attorney in the fidelity and surety loss department. In 1958 he was made assistant manager of the department and appointed an assistant vice president of Chubb & Son. In 1972, Kiser was made manager of the bonding loss department and at the same time was named a vice president. He served as trustee of the Village of Williston Park, Nassau County, N.Y., between 1958 and 1960. He was a member of the Virginia State Bar Association, the New York State Bar Association and the International Association of Insurance Counsel.

### 1961

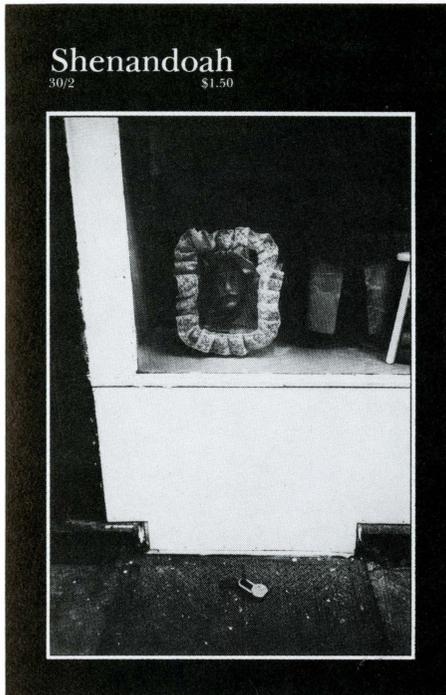

R. KENT FRAZIER, a partner in the Atlanta law firm of Sutherland, Asbill & Brennan, died on June 7, 1979. While at W&L Frazier was a member of Phi Beta Kappa, the Cadaver Society, and

Omicron Delta Kappa. He was also president of the student government. Following graduation from Harvard Law School in 1964, Frazier was a captain in the U.S. Army Intelligence for two years. He was a frequent lecturer at professional seminars and was chairman of several committees of the Young Lawyers Section of the Georgia Bar Association.

“

I go on admiring [*Shenandoah*], none in the country does better with its resources.

—Robert Lowell, 1967

I can think offhand of only two or three university-financed reviews in which the impact of a strong editorial personality has created a vital magazine. The examples that come to my mind are those of David Ray and the strong social-radical consciousness he has brought to the editing of *New Letters* for the University of Missouri at Kansas City; of the elegant and rather patrician standards James Boatwright has given to *Shenandoah* at Washington and Lee; and of Robin Skelton, who has brought such a distinctively international flavor to the *Malahat Review* at the University of Victoria in British Columbia.

—George Hitchcock, editor of *Kayak*, in *The Little Magazine in America: A Modern Documentary History* (TriQuarterly, Fall 1978)

You are the best “little” magazine in the country.

—Allen Tate, 1970

In this year's collection are twenty-one stories. . . . Sixteen were first published in the pages of little magazines, quarterly reviews, irregularly issued periodicals reaching a small, a very small, readership. (*Shenandoah*, for example, one of the best of these magazines from which I have taken two stories, prints approximately one thousand copies of each quarterly issue.)

—William Abrahams, in the introduction to *Prize Stories 1979: The O. Henry Awards*

Dr. Robert Coles, child psychiatrist and author, is, by his own description, one of those “Yankees who went south and fell in love with the region.” He is a loyal subscriber to several “good southern literary quarterlies”: *The Sewanee Review* . . . *The Southern Review* . . . *The Georgia Review*; and *Shenandoah*.”

—“Where Opinion Makers Get Their Opinions,” *Esquire*, June 5, 1979
